

WRN Broadcast Media Village

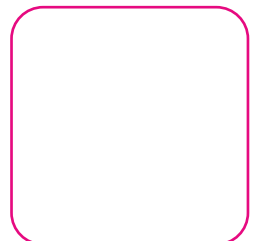

With over 6000sq ft of office and studio space, WRN Broadcast's Media Village, located in Vauxhall, London, UK (adjacent to our broadcast centre) is the latest addition to our host of broadcast services.

Whether you have 5 or 50 people, our Media Village can easily accommodate your business needs. We can assist in the commissioning of studios, edit suites, voice-over booths and even your own master control room. The Media Village also offers clients access to the full range of services available via the WRN Broadcast Media Centre – ingest, content management, playout, distribution, archive and storage, plus broadcast data centre services.

WRN Broadcast offers you a secure environment to ensure your space is protected 365 days a year.

With such a great location in London, the Media Village could not be more convenient. Located just a 5 minute walk from Vauxhall rail and Underground stations, access into central London is just a few minutes away.

OHTV joins WRN Broadcast's South London Media Hub

Introduction

- Inspirational entertainment broadcaster, OHTV, sought a partner to provide managed studio and office space, satellite capacity and end-to-end technical support services to enable it to expand into a greater variety of worldwide territories
- Launched in the UK in 2008 on Sky channel 199, OHTV is a 24/7 entertainment channel dedicated to providing the best of uplifting, inspirational and challenging content from the UK and around the world
- International broadcast services company, WRN Broadcast, was chosen due to its unique ability to offer the broadcaster a customised solution encompassing 24/7 technical support, satellite capacity and studio space within its Vauxhall-based Media Village. OHTV recognised the exceptionally high technical standards, innovative offering and cost-effective solution that the first-of-its-kind Media Village offered – with key benefits including strong internal and external communications infrastructure, a prime location and its dedicated on-site technical expertise.

Solution

- OHTV relocated to WRN Broadcast's Media Village in May 2010
- WRN Broadcast worked with OHTV to purpose-build a new TV studio with lighting and gantries, gallery and green room. While it is primarily for the use of OHTV, the space is also available to other companies during downtime

- As well as office and studio space, OHTV benefit from uplink and satellite capacity on the Eurobird satellite at 28.5°E for broadcast on Sky, ad hoc downlinks and encoding services.

Result

- OHTV are now permanently based in WRN Broadcast's Media Village and benefit from reliable and professional service, custom-built facilities and reactive services and support. This has allowed OHTV to produce a greater amount of its original content directly and to house its entire offering under one roof
- Dedicated satellite uplink capacity has allowed the broadcaster to launch in more markets, including the US and Africa.
- Akin Salami, CEO, OHTV, says "Locating in WRN Broadcast's Media Village gives us purpose-built facilities, more office space, improved services and reduced costs; the ideal scenario. We look forward to seeing which other companies will join us."
